PROFESSIONAL SUMMARY

MCA graduate with hands-on experience in Java, Python, SQL, and full-stack web development. Skilled in Object-Oriented Programming, REST API development, and database integration (MySQL, MongoDB). Delivered a production-ready Showroom Management System during a software development internship. Seeking an entry-level Software Engineer role to build scalable, real-world web applications.

TECHNICAL SKILLS

Languages: Java (Core), Python, JavaScript, SQL, PHP

Web Technologies: HTML5, CSS3, React.js, REST APIs, DOM Manipulation

Frameworks & Tools: Git, GitHub, Spring Boot, JDBC, Postman, VS Code

Databases: MySQL, MongoDB

Productivity & Analytics: MS Office, MS Excel, Power BI

Concepts: OOP, Data Structure, SDLC, CRUD Operations, Client-Server Architecture, TCP/IP, OSI Model

INTERNSHIP EXPERIENCE

Software Development Intern — Xworkz ODC, Bangalore

Feb 2026 – May 2026

- Implemented Core Java OOP concepts (inheritance, polymorphism, encapsulation) in structured assignments
- Developed responsive UI components using HTML, CSS, and JavaScript with DOM manipulation
- Performed CRUD operations and complex queries using SQL and MySQL for backend data management
- Managed source code and collaborated using Git and GitHub for version control
- Built a full-stack Suzuki Showroom Management System using Java, MySQL, and JavaScript

PROJECTS

Post-Harvest Loss Prediction Using Machine Learning

2025

- Designed and deployed a web application to predict agricultural crop loss using trained ML models
- Built RESTful backend with Python Flask, integrated MongoDB for storing prediction data
- Consumed real-time weather APIs to enhance prediction accuracy with live environmental data
- Handled full client-server communication pipeline including request routing and JSON response formatting

Tech Stack: Python, Flask, MongoDB, HTML, CSS, JavaScript, REST APIs, Machine Learning

Showroom Management System

2026

- Developed a web-based showroom management system using Spring Boot and MySQL.
- Implemented secure login, role-based authentication, and CRUD operations for bikes, customers, bookings, and showrooms.
- Built REST APIs and integrated a responsive frontend for efficient data management.
- Created an admin dashboard for inventory, customer, and booking management.

Tech Stack: Java, Spring Boot, Hibernate, Spring Security, MySQL, HTML, CSS, JavaScript, Bootstrap, Maven

EDUCATION

MCA | Jawaharlal Nehru New College of Engineering, Shivamogga | 2026 | 85%

BCA | Government First Grade College, Thirthahalli | 2024 | 76%

PUC (PCMB) | Government PU College, Thirthahalli | 2021 | 81% SSLC

| Government High School, Kondlur | 2019 | 92%

CERTIFICATIONS

- SQL and PostgreSQL for Beginners — Udemy (2025)
- Data Analysis with Python — NPTEL (2025)
- Full Stack Developer Course — Simplilearn (2025)
- Data Analytics & Business Intelligence — Maincrafts Technology (2026)
- Cloud Computing (Elite Gold) — VTU Centre for Online Education (2026)
